

Mathematics - a simple tool for geologists

Chapman & Hall - Mathematics : a simple tool for geologists (eBook, 2000)

[play.fridaynightfunk.rf.gd]

A Noncomprehensive Table of Parameters		
Method of Calculation		
Polygonal		
Inverse Distance Methods (ID)		
Kriging		
Kriging		
No Data Transform	With Data Transform	
Simple	Log normal, with or without bias adjustment	
Ordinary	Indicator (first indicator using quantiles as cutoff)	Cutoff
Support, Block or Partial		
Nearest Neighbors		
Type of model		
Range, sill and range		
ID		
Power laws		
Data		
Transform options		
None		
Indicator		
Nearest Neighbors		
Normality		
Cropping		
Grid dimensions		
Number of rows		
Number of columns		
Number of levels (if three dimensional)		
Spacing between rows, columns, and levels		
Number, N, of nearest neighboring sample locations used for estimation		
Search window radius for locating nearest neighbors		
Search window settings: general, quadrant, octant		
Anticompensation considerations: Major axis direction, plunge direction, dip, ratio of major axis/minor axis
