In this remarkable tour de force of investigative reporting, however, James Bamford penetrates the NSA's vast network of power -- the acres of computers, the electronic listening posts worldwide, the intelligence-gathering satellites, and the people who control them. Former owner's name on top edge and inside front cover. So be careful what you say, write, post, blog, cast, email, text, etc.

The Puzzle Palace: a Report on Nsa, America's Most Secret Agency

The National Security Agency is an organization whose sole purpose is to decode and get hold of information and secrets held by other countries. The book is nearing middle age and becomes less relevant yearly.

The book more or less ends with The Church Committee hearings and warnings about the growing power of the NSA and what it can do to our democracy if left unchecked again, a timely warning, even in 1982 but bizarrely, there's an odd Afterword which deals with the history and structure of Britain's NSA the GCHQ and the discover of a double agent for the Soviets inside it. In 1967, a US Navy-NSA surveillance ship observing the Six-Day War was attacked by Israel, 34 crew were killed and 170 wounded before the Israelis realized their mistake; Bamford says that the official US-Israeli story about the attack doesn't hold water; I've read an article claiming that the theory that the attack was deliberate has its own set of problems. It's an interesting time Snowden leaking NSA's PRISM program to read about the history of the NSA.
