What did Karl Marx believe about revolution?

First, a certain degree of regimentation and teamwork is demanded of workers by management who are tasked with extracting as much labour as possible within the timeframe of the working day.

Marxism, Liberalism and the Process of Industrialisation by James D Young 1969

These processes produce a collective class-consciousness, far beyond what most atomized slaves or serfs ever could. In the communist socio-economic organization, the relations of production would operate the and employ.

Does capitalism need some Marxism to survive the Fourth Industrial Revolution?

One of the loudest criticisms of Marxism is that it doesn't--that the working class has been shrinking in importance and numbers as capitalism has developed. But it ever rises up again, stronger, firmer, mightier. Taken as a whole, the options outlined above are tantamount to systemic change to keep pace with the human fallout that Schwab warns could come our way.

Marx's theory of working

During the boom phase of the economic cycle, capitalists are far more likely to grant union demands, while in periods of recession—and high unemployment—the tables are reversed.

Marxism and The Industrial Revolution

Communism and socialism aim to right the wrongs of capitalism's free-market system. Output per worker remained very low, and so did wages. A new concept of class was being based on economic terms of the rich and the poor.
