## EUR

However, the regular annual migration of epidemics of influenza, poliomyelitis, and rotavirus infection from northern latitudes across the equator to southern ones and back does not necessarily imply that the pathogens themselves migrate in this way.

## Couchee

Crowding of susceptible persons is one of the most common explanations for seasonal infectious diseases, and it certainly has biologic plausibility.

## Seize et une variations

Hadamard was elected to the in 1916, in succession to , whose complete works he helped edit. On the other hand, if these annual troughs are due to increased host resistance, opportunities abound for studying and modifying these changes.
