Types of Copper Alloys and their Uses

The alloy was prepared subsequently followed by addition of grain refiner and varying the mould temperature. China, 28 2018 , No. The microstructure obtained at different distances from the chill surface for alloys A2, A3, and D1 is shown in Figure.

The Effect of Hot Tearing in Semi Solid Casting of Aluminum A201 Alloy

The mean value of four data sets was reported as the ultimate fluidity length. Open Access This article is distributed under the terms of the Creative Commons Attribution 4.

Hot tearing mechanisms of B206 aluminum

Cáceres: Light Metals, 2005, TMS, Warrendale, pp.

Hot tearing mechanisms of B206 aluminum

Grain refiners provides nucleating sites in the form of $TiAl_3$ and TiB_2 particles as seen in XRD analysis. Figure shows results from the hot tear location of alloy A6 with 0.
