Diseases and Abiotic Problems of Greenhouse Tomatoes

Seeds tend to blow into the space when the door opens or during ventilation to control the temperatures.

Diseases of vegetable bedding plants

Look for localized symptoms such as root lesions, cutting end rot, leaf spots, and shoot blights.

Greenhouse Disease Management

The sun will provide light and some heat, but as a greenhouse gardener, it's up to you to give your plants everything else they need while serving as a pest and problem watchdog.

Diseases

Water-soaked lesions appear on lower stem, usually within 2 feet of the soil line. Therefore, *Dieffenbachia* is among the top 10 most popular plants produced by commercial foliage growers in Florida.

Minituber Production in Greenhouses

Warm air holds more moisture than cold air.

Greenhouse Disease Management

Plant wilt and decline follows.

Diseases of vegetable bedding plants

The spots may enlarge rapidly and the centers of the spots may fall out, leaving holes. Soil-borne diseases include damping-off *Pythium* and

Rhizoctonia , black root rot Thielaviopsis , and several other root rots and wilts caused by Fusarium and Phytophthora.
