Risk Management and Insurance

Expand along the value chain. Another source of problems is demographic changes and generational shifts.

'Board members must be accountable for ESG standards'

Shoes drove the business, but increasingly Nike replicated its success with adjacency moves into apparel and hard goods.

Government of Canada Information Technology Strategic Plan 2016

Fraud detection is the one AI tech trend that no one has ignored.

Risk Management and Insurance

For insurers catering to the growing markets in Asia, Africa, and the Indian subcontinent, tailored offerings based on data collected from wearables and telematics will be key. Cross sectional research methods are combined with the notion of stable equilibria to analyse the fit between the positioning or resource base of the firm and its performance. However, the inadequacies of this tradition are increasingly being recognised even by the scholars who created it Porter 1991.

Global insurance market trends

At the same time, we must balance the growing demand for IT services with realistic capacity limitations. It refers to the degree to which an organization is involved in or affected by businesses in other countries.
