Well-plugging records Make and keep a record of any plugged well.

#### 4.41.1 Oil and Gas Handbook

Less permeable material is placed over the sand and gravel to reduce the potential for contaminant movement from the surface to the aquifer below. The reason for this is that most engineering appraisals, upon which purchases are based, value leasehold and equipment together. Remotely operated underwater vehicles ROVs are used to carry out the work of connecting the wet trees, lines, and equipment packages.

#### 4.41.1 Oil and Gas Handbook

Generally, no depreciation is claimed on the inventory account. Transfers from the inventory account constitute purchases of equipment. Regardless, a MODU will be utilized to perform all of the final completion operations, including installation of the subsea tree before leaving the

location.
