complex problems in industrial applications. Teetor Award for Engineering Educators.

CML

Failure modes and effects analysis of compressed natural gas fuel systems for cars and trucks. Failure Analysis Associates, Menlo Park, CA. Kelly Award, presented by the British Carbon Group at the 1st World Conference on Carbon, Berlin, July 9-15th, 2000, for outstanding research by a scientist younger than 35.

Robert D. Caligiuri

Carlsbad, NM, Pipeline Rupture—Investigated the failure of a 36-inch natural gas transmission line, including evaluation of the effects of internal corrosion. Microindentation tests were performed on micropins extruded from workpieces of both grain sizes to obtain a measure of the distribution of induced strain.

Conference

Effects of Processing on Properties of Advanced Ceramics

Robert Caligiuri specializes in combining the principles of solid mechanics with an understanding of the physical, mechanical and corrosion behavior of metals to solve

Failure Analysis Associates, Menlo Park, CA. Fire-Damaged Refinery Process Vessels—Performed an API 579 fitness-for-service analysis on pressure vessels and heat exchangers damaged by a fire at a refinery.

Progress in reliability research in the micro and nano region

Our effort in the subject of cohesive zone models is centered on the cohesive law: its physical meaning and conditions it must satisfy. Shipping Container Trailer Weld Failure—Examined the cause of the failure of a mudflap assembly on a trailer used to transport shipping containers.

ASME Press (American Society of Mechanical Engineers)

Organized and prepared graphic presentations for engineering projects.
