

Novel B[beta]-lactams, their antibacterial and pharmacokinetic properties and pre clinical evaluation.

Aston University. Department of Pharmaceutical Sciences -
Pharmacokinetics/Pharmacodynamics of Antiviral Agents Used to Treat SARS

Description: -

-Novel B[beta]-lactams, their antibacterial and pharmacokinetic properties and pre clinical evaluation.

-Novel B[beta]-lactams, their antibacterial and pharmacokinetic properties and pre clinical evaluation.

Notes: Thesis (MPhil) - Aston University, 1991.

This edition was published in 1991

Nitrofuranyl Methyl Piperazines as New Anti

Hericium erinaceus mushroom extracts protect infected mice against Salmonella typhimurium-induced liver damage and mortality by stimulation of innate immune cells. Potential natural compounds for preventing 2019-nCoV infection.

Pharmacokinetics/Pharmacodynamics of Antiviral Agents Used to Treat SARS

The last search update was in November 2014. Children younger than 12 years of age have a smaller AUC, a faster clearance and a shorter elimination half-life than adults.

Design, Synthesis, Biological Evaluation and Pharmacokinetics of Bis(hydroxyphenyl) substituted Azoles, Thiophenes, Benzenes, and Aza

The dynamic drug response of intracellular Mtb residing inside macrophages is dramatically different to that of extracellular Mtb.

Comparative Pharmacokinetics of the Carbapenems

The Journal of Steroid Biochemistry and Molecular Biology 2009, 114 3-5 , 200-206. There may be a case in CF patients for considering more frequent dosing or even continuous infusion for severely ill patients.

Design, Synthesis, Biological Evaluation and Pharmacokinetics of Bis(hydroxyphenyl) substituted Azoles, Thiophenes, Benzenes, and Aza

Rowland reported a rapid early fall in lignocaine plasma levels after the administration a 50 mg bolus dose.

Meropenem Clinical Pharmacokinetics

Carmeli Y, Armstrong J, Laud PJ, Newell P, Stone G, Wardman A, et al. Moxifloxacin-containing regimen greatly reduces time to culture conversion in murine tuberculosis.

Antibacterial activities of ethanol extracts of Philippine medicinal plants against multidrug

Triazole ring-opening leads to the discovery of potent nonsteroidal 17 β -hydroxysteroid dehydrogenase type 2 inhibitors. In addition we review the dosing regimes and infusion kinetics of lignocaine in the clinical setting. The bioavailability of MSI-195 was higher in males than in females as shown by a higher C max and AUC.

Linezolid pharmacokinetics and pharmacodynamics in clinical treatment

Management of acute bacterial skin and skin structure infections with a focus on patients at high risk of treatment failure.
