Parenting Literature

Secondary outcomes focus on specific social skills children learn during SST and on more general social skills pertaining to home and community settings from a multi-informant perspective. Assessments were planned at three moments: before randomization, immediately after the intervention period, and at 6 months follow-up after the end of intervention. They included studies until December 2011 in their analysis, all performed in the US.

Skills training for children with behavior problems : a parent and practitioner guidebook

Children are taught through instruction, directed positive feedback, observation, and role-play. Patterson, Marion Forgatch Parents and Adolescents Living Together, Part 2: Family Problem Solving By Gerald Patterson, Marion Forgatch Behavior Disorders The Difficult Child by Stanley, M. Another addition is that the teacher is coached to support the child in school.
