Martin

Also, geometric figures, a review of angles, lines, and special triangles, are covered in the appendices. New or adjunct faculty may find the videos useful for review.

Intermediate Algebra A Graphing Approach by Elayn Martin

In addition, a reference to alternative or additional Real World Activities is given. Real Numbers, Algebraic Expressions and Equations 1.

0130166332

This revision of Martin-Gay's algebra series continues her focus on students and what they need to be successful. All videos are presented by Elayn Martin-Gay to ensure 100% consistency with the text, and are available in both MyMathLab ® and on the Interactive DVD Lecture Series.

Intermediate Algebra: A Graphing Approach / Edition 5 by Elayn Martin

Usually ships within 24 hours in quality packaging.

Unique Spotlight on Decision Making exercises and a new four-step problem-solving process are incorporated throughout to focus on helping to build students' problem-solving skills. These explorations, integrated appropriately throughout the text, are often for use with graphing calculators or computer graphing utilities. The geometry concepts presented are those most important to a student's understanding of algebra, and I have included many applications and exercises devoted to this topic.

0130166332

Writing opportunities also occur within features such as Spotlight on Decision Making and Chapter Projects. The text now includes the following types of exercises: spotlight on decision-making exercises, mental math, computational exercises, real-life applications, writing exercises, multi-part

exercises, review exercises, a look ahead exercises, calculator or graphing calculator exercises, data analysis from tables and graphs, vocabulary checks, and projects for individual or group assignment.
