## Sangaku (Japanese votive tablets featuring mathematical puzzles)

This is a negative for me, because I kind of expect such a quirky show to flash me with near epileptic magic spells and summons.

## Bestiary

I personally enjoy konosuba mostly because of how much it feels like a parody, watching the dub is even more fun its like a group of friends that got together and had fun, and you get to have fun with them.

### **Sengoku 3**

After finished sucking, the book automatically closes and falls to the ground, and the icon on the cover flashes with the purple aura. Each character also has their unique special attacks performed by pressing down twice and one of the attack buttons and an ultimate magic technique that can wipe a clear a screen of enemies in one shot.
