Contribution of the Forestry Sector to the National Economy

A review of the literature.

Bill Text

The declining export role of forest produce in the national economy is partly due to the over- exploitation of the high quality timbers in the previous decades and partly to the inability of the forest departments and the timber trade to develop the secondary species which now constitute the main timber contents of the forest estate.

Economic Contribution of the Forest Sector in North Carolina, 2018

The Bank also supports public-private initiatives to establish, manage and harvest plantations and orchards on government-owned land.

Washington State Forest Products Sector

A thematic study on forest ownership and resource tenure will complement the information provided in FRA 2005.

Forests Generate Jobs and Incomes
