Personality Development

Whitby, ON: de Sitter Publications.

Family Characteristics Have More Influence On Child Development Than Does Experience In Child Care

In this view, development does not lurk directly in the people studied but resides in the perspective used.

Infant and toddler development

Germán Posada, PhD Research Interests Child-mother attachment relationships, secure base phenomenon, attachment representations, caregiving and socialization outcomes, marital relationship and attachment, cross-cultural issues in attachment research Biography Dr. Hannah, Domino, Figueredo, and Hendrickson explored predictors of Integrity vs.

Family size and child development

Rudolph, in , 2011 Family environment In addition to inherent genetic overlap among family members, the family environment represents an area of psychosocial risk for depression. The study included children from ethnically diverse and economically disadvantaged households. It is interesting that the mean proportion of those remaining stable in identity status was so high, especially during the time of late adolescence that Erikson has identified as central to the identity formation process.
