

# Investigation of potential benefits of hyper-stereoscopic video for aerial search and reconnaissance

National Library of Canada - US8463765B2

Description: -

-investigation of potential benefits of hyper-stereoscopic video for aerial search and reconnaissance

-

McGraw-Hill series in mechanical and aerospace engineering

McGraw-Hill series in mechanical engineering

Canadian theses = -- Thèses canadiennes investigation of potential benefits of hyper-stereoscopic video for aerial search and reconnaissance

Notes: Thesis (M.A.Sc.) -- University of Toronto, 2000.

This edition was published in 2000

Filesize: 45.47 MB

## Aerial Photography Principles and Applications

Orthophotos, stereoscopic photographs, and photographs with some topographic information are invaluable to an experienced interpreter. This chapter will show how the U. Alluvial terrains, lacustrine deposits, water melt channels, colluvial deposits, alluvial fans eskers, and kames are strong indicators of the types of soils to be found below the surface.

## National Aerial Surveillance Program

This data is obtained from two sources: 3D point clouds of prior inspections and terrain data exported from Google Earth.

## Flying Inspections

Multi-instance applications, with each instance potentially supporting multiple views, may be created and executed. However, the reduced dynamic range the cameras have could mean reduced sensitivity across all material types. Sometimes a high frequency of past landslides indicates a greater probability of future landslides; at other times it may indicate a lower probability of future landslides because an area has stabilized.

## Benefits and costs of drone use for disaster response — Drones in the RCRC documentation

More important, many of the decisions made by government officials well before 1957 at the time actually helped set the stage for what was to follow. First, it was growing rapidly. Congress, House of Representatives, Independent Offices.
