## Economics Case Studies

Goetz and Fleming analyze 2,953 counties, including both rural and urban places, and find that, after controlling for other factors that influence growth, those with a larger density of small, locally owned businesses experienced greater per capita income growth between 2000 and 2007. During the 1920s, the socialist calculation debate unfolded in German on the European continent, triggered by 1881-1973 work *Gemeinwirtschaft*.

## The effects of wind power on electricity markets: A case study of the Swedish intraday market

As a result, the central bank loses control of the money supply, which then passively adjusts to the demand for money domestic liquidity.

## 50+ Economics research Topics and Topic Ideas for dissertation

This paper explores the possibility that a major factor driving economic inequality is corporate consolidation — the growing market share of a few big companies.

## Economic growth and welfare state: a case study of Sweden

The results confirm the theory, finding that sales of hardware and building supplies grow in the host communities, but at the expense of sales in smaller towns nearby.
