Clinical Practice Guidelines

If a fall is serious and results in severe pain, bruising or bleeding, take your loved one to the emergency room. For that reason, a stroke is considered a medical emergency and requires prompt diagnosis and treatment. Data sources: Six databases were searched for relevant published reviews that assessed patient- and family-centered care interventions and were reported on in English in peer-reviewed journals up to September 18, 2017.

The Stroke Recovery Book: A Guide for Patients and Families by Kip Burkman

The brain is deprived of oxygen and nutrients, and brain cells begin to die within minutes.

Heart

These risks include controllable factors those you can change and uncontrollable those you cannot change.

Heart

Although stroke is often considered a disease of aging, the risk of stroke in childhood is actually highest during the perinatal period, which encompasses the last few months of fetal life and the first few weeks after birth. Smoking greatly increases the risk of stroke and has been linked to the buildup of fatty substances in the arteries.
