## Annual Service Plan Reports 2004/05

I wanted to switch topics again and go back to your announcement, which was news to me.

## Characterizing sustainable forest management at the local

Third, it was also important to develop local connections and appropriate governance models with partners and non-partners in industry, government, local communities, Aboriginal groups, and beyond. Environment Canada, in partnership with the US Environmental Protection Agency, is developing the Environmental Valuation Reference Inventory EVRI. In addition the CSA has consulted government departments interested in using the information from Space-based Automatic Identification Systems S-AIS and, in FY 2016—17, will support up to five studies aimed at developing concepts and plans to improve the monitoring of vessels using S-AIS.

## Canadian Forest Service

It does so by restoring public confidence in the process; by renewing our nation-to-nation relationship with indigenous peoples through meaningful consultations; by ensuring direct and upstream greenhouse gas emissions linked to a project are considered; by basing regulatory decisions on science and evidence; and by ensuring this evidence includes traditional indigenous knowledge. In each case, a comprehensive environmental management plan is being developed with the involvement of various stakeholders.

## — Performance Report for the period ending March 31, 2006

Water management An exploratory discussion on water management would allow for better understanding of how water policies are organized in each country, with a view to identifying themes for potential further discussions. To properly support humanitarian decision makers, Charles et al. Budgetary Financial Resources dollars 2016-17 Planned Spending 2017-18 Planned Spending 2018-19 Planned Spending 5,458,160 3,308,160

2,580,160 Human Resources FTEs 2016-17 2017-18 2018-19 7.

**Promoting Sustainable Forest Management Among Stakeholders in the Prince Albert Model Forest, Canada Hvenegaard GT, Carr S, Clark K, Dunn P, Olexson T**

Optimal utilization of the International Space Station ISS. Sustainable development was incorporated into the new mandates of the federal ministers of Industry, Agriculture and Agri-Food, and Natural Resources in 1994. Modeling the spatial variation of the explanatory factors of human-caused wildfires in Spain using geographically weighted logistic regression.

**Research Money Inc**

The Department informed us that it has developed options for a departmental science and technology information system. To me this sends a mixed message, if you are going to delay projects like energy east—I am not saying that we want to rubber-stamp it tomorrow, because it has to go through the program, but you have said you are going to delay it—and if you want us to look at other ways to make up the loss of these jobs, including 100,000 in Alberta alone. An Industry Canada Evaluation Directorate representative sat on the Genome Canada Evaluation Steering Committee in order to provide input into the methodology and to provide comments on the report.

**Audit of Management of Laboratories (AU1414)**

That review will start, but it's going to take some time.

**Green Economy**

Canada has a strong interest in reconciling trade and environment concerns in international legal instruments and is participating actively in intergovernmental fora dealing with this issue including the World Trade Organization WTO Committee on Trade and the Environment and the Organisation for Economic Co-operation and Development OECD. This detection resulted in a slight expansion of the western edge of the quarantine area boundary CFIA, 2014b. Information No information is available.
