## UPDATE: A Basic Guide to International Environmental Legal Research

Do be advised that shipments may be delayed due to extra safety precautions implemented at our centres and delays with local shipping carriers.

## Environmental Change and International Law New Challenges and Dimensions

Their statement emphasized the disproportionate cost of climate-related damage younger generations would bear. Global change is likely to engender conflict—about whether it is in fact occurring, whether any organized response is necessary, whether response should emphasize mitigation or not, who should pay the costs, and who has the right to decide.

## International Environmental Agreements: Politics, Law and Economics

The international system is dominated by agents reluctant to relinquish parcels of power to build universal commons - that is, little committed to global governance. The federal government should support an effort to validate the most promising remotely sensed indicators of social phenomena and include them in the information network.
