The Biology of Decapod Crustacean Larvae

Micro-photography A microscope equipped with a built-in camera and reflected light is useful Fig. Chalimus Burnmeister, 1834 is also a synonym for Nordmann, 1832. Melzer, unpublished Many researchers will find it challenging to prepare larvae of a total length of only 500 µm adequately for SEM studies.

In all cases, light is one of the most important factors. Chalimus plural chalimi is a stage of development of a copepod parasite of fish, such as the Lepeophtheirus salmonis.

Crustacean larva

We summarise here the principal steps required from a living larva to a histological image.
