full-time nonunion women in the private sector.

An empirical inquiry into the determinants of public education spending in Europe

First, we suggest that threat effects are likely to redound to more than simply those employees most at risk of organizing.

International Handbook of Trade Unions

Moreover, the empirical results seem to be sensitive to some basic robustness checks.

Economic development and wage inequality: A complex system analysis

Then, along the same lines of the Fitness-Complexity algorithm, in order to remove any trivial correlations with wage volumes, in matrix we report only whether a sector is present or not in a region.

An empirical inquiry into the determinants of public education spending in Europe

All three regressions indicate that immigrants depress wages, and the effect seems to vary across occupations. The bottom line represents the difference between these two wage categories for

Encouraging labor cartels will also lengthen the current recession.
