## Designing an intelligent prolog tutor

What's more, we bring together qualified and seasoned Prolog tutors, enthusiasts, and consultants that are eager to be part of the story of your success in programming. The media generally have tended to sporadically overrate a small subset of developments in this field while ignoring or giving only superficial treatment to the rest. Nevertheless, with the advent of microprocessors and the prospect they afford of widely available computing power, thousands of educators and parents are beginning to seriously ponder what the role of computing will be in human learning and what action they can and should take to affect it.

## CiteSeerX— The Unification Tutor: An intelligent educational system in the classroom

If modifying it or replacing it by an alternative framework helps with the process of internalizing the ideas advanced in the various articles, then such modification or replacement is in order. The stress and pressure of handling everything at once overwhelm most students.

## The Computer in School: Tutor, Tool, Tutee

The authors speak well, even brilliantly, for themselves and do so clearly enough to need no explanation.

## TUTOR : A computer

Wyzant helps more students find face to face lessons, in more places than anyone else. It has included imaginative use of robots, graphics, and sound as a child-attractive alternative to traditional textual output.

## Designing an intelligent prolog tutor

The framework must be accurate enough for the reader to make the associations between it and the articles for himself or herself. In tool mode, the computer provides a service that the user needs and more or less knows how to use. For one thing, in tutor mode, the material can be presented interactively, and dynamic graphics and other sophisticated teaching aids can be integrally used.

## The Computer in School: Tutor, Tool, Tutee

Seymour Papert A professor of mathematics and an educator at M.

### **The Computer in School: Tutor, Tool, Tutee**

By presenting past accomplishments, the essays will encourage the new entrant to use them and build upon them rather than to blindly create them anew. As several of his article titles suggest, his strongest emphasis is upon the computer as a new and fundamental technology worthy of study on its own. To use the computer as tutor and tool can both improve and enrich classroom learning, and neither requires student or teacher to learn much about computers.
