Forest, paper and packaging industry insights and services: PwC

Wikipedia citation Copy and paste this code into your Wikipedia page. Consumption of pulp During the past decade, the has decreased slightly, from a high of 184 million metric tons in 2011 to 177 million metric tons in 2018.

Forest, paper and packaging industry insights and services: PwC

The award-winning project was originally a research and development effort by ANDRITZ. The industry continues to be affected by ongoing calls for a paperless society, declining consumption of printing and writing paper driven by digitisation and an increase in the off-shoring of printing. Engineers love to focus on the technical aspects, but understanding what the AI means to people has been more important to making progress in development.
