## MEASUREMENT PDF

This Module will deal with one part of taking out the quantities of the different items of construction involved in the house and other civil engineering works assuming that other jobs preparation of drawings and assuming suitable rates and working out the costs have already done or will be done by the concerned parties. Alterations to dimensions It is sometimes necessary to substitute amended dimensions in place of those which have already been entered on the dimension paper.

## MEASUREMENT PDF

Sheets should be suitably headed with the title and section of the job at the top and numbered at the bottom.

### The Implication of the Standard Method of Measurement (SMMs) for Building Works Toward Contractors' Works

The area is measured in square meters to the extremities of the foundations and the average depth, often 150mm, is included in the description together with the method of disposal on the site.

## [PDF] SMM7 STANDARD METHOD OF MEASUREMENT OF BUILDING WORKS PDF

Preparatory work- rubbing down, repairing cracks, scrubbing 5. Grade 20 in foundations b Spacing of items - It is essential that ample space is left between all items on the dimension sheets so that it is possible to enable any items which may have been omitted when the dimensions were first taken off to be subsequently inserted without cramping the dimension disproportionately.

### The Implication of the Standard Method of Measurement (SMMs) for Building Works Toward Contractors' Works

Seek to achieve a good standard of presentation.

## **The Implication of the Standard Method of Measurement (SMMs) for Building Works Toward Contractors' Works**

Within each element, the items, may be billed in trade order or grouped in building sequence. The structure of the team concerned with the construction of a civil engineering project is similar to that for building works. It is measured in square meters.
