On the origins of Dee's mathematical programme: The John Dee

We found this book important for the readers who want to know more about our old treasure so we brought it back to the shelves. The first two columns contained the and of for parallels spaced 10 minutes apart on a sphere, while the third column had the parallel's projected distance from the Equator. I should have indicated my motives more clearly, but I couldn't have put it more eloquently than Andrew, with whom I agree entirely on this matter.
