Design Strategies for Thin Film Optical Coatings

Tiwari CIS and CIGS Layers from Selenized Nanoparticle Precursors EMRS-Spring Meeting, 18-21 June 2002, Strasbourg, France, Refereed and accepted for publication in Thin Solid Films 2003. Conclusion and Projected Future Impacts Inspired by the structure of biological optic systems, the nanolayered polymer film approach to designing and fabricating GRIN lenses with arbitrary refractive index distribution profiles along with independently prescribed lens surface geometries has enabled the design and fabrication of a whole new class of gradient index optics.
