## Canadian Minerals Processors

The algorithms developed and used in practice for non-linear systems are: 1. Please contact , Program Assistant, at 604-432-8683, if you have any further questions regarding the camp.

## Mining in Canada

This course will provide an overview and descriptions of mineral processing and will describe process controls including detectors, indicators, gauges, switches, and control loops. Robotics The application of robotic technology, although very limited in current mining operations around the world, has far reaching potential for the mining industry. Geochemical models have been developed to provide improved predictions of the magnitude and duration of environmental concerns.

## Certificate in Mining Technologies

The precision improvements offered by the new device are expected to further drive the success in exploration efforts by mining companies.

## Canada

Some of the lithium minerals are more soluble than the others. The IMI group is excited to bring new technologies to this industry and help our customers improve performance and minimize cost.
