Štátny geologický ústav Dionýza Štúra

История развития островов довольно своеобразна. Detailed information about each image is given and other photographs from the surrounding area can also be viewed. In last years records focused to the small-size especially protected areas are updated.

Geomorphology of the Bering Island Coastal Area

Uz elemente i, pažnja se posvećuje i problemima usmjerenog interesa, voda, mogućnost geotehničkih zahvata i dr. Generally, the following total regularities of geomorphological structure and matter distribution in the beach area are noted for the shore of the whole island. Рельеф хребта, по большей части, денудационно-тектонический, что подчеркивается высоким, до 100—250 м, береговым уступом, круто обрывающимся к морскому побережью.

Geomorphology of the Bering Island Coastal Area

Клифы здесь очень активные и служат источниками поступления обломочного материала в береговую зону. Danas se sveučilišna nastava geologije održava na dva zagrebačka fakulteta: Rudarsko-geološko-naftnom i Prirodoslovno-matematičkom.

Geologija

An explanation of these categories is given on Czech Agency for Nature and Landscape Protection.
