#suggests #its #was.

Saturn (astronomy)

But there is a crucial difference: Saturn is forming far from the sun.

Saturn

But because of the presence of crucial elements, it might be a very different story if Titan were to warm up. If you could find a bathtub big enough to put Saturn in, it would float.

Saturn

. But if I had to bet right now, based on what we do know, I would place money on the idea that this universe is full of a great number of habitable worlds.

Was Saturn the original Sun? Ancient mythology around the world suggests its was.

Some of them, like a planet called Kepler-22b, might even be able to harbor life. Saturn's north pole has an interesting atmospheric feature—a six-sided jet stream.

Saturn (astronomy)

Jupiter is the only planet that is bigger. Hyperion has a diameter of about 121.

NASA

Of these, Rhea is the second largest — measuring 1,527 km in diameter and 23×10^{20} kg in mass — and the ninth largest moon of the Solar System. Much farther out, there is the very faint Phoebe ring in the orbit of Saturn's moon Phoebe. Janus was a figure who looked two ways,
