Many of the teachers he observed had learned to be pleased with their lessons

when they could see students demonstrating engagement and cooperating with the requirements of the assigned activities. They map out what learning activities you will conduct in the classroom, what materials you will need, and what assessments you will give. Ethics is the study of moral values and principles.

Thinking Philosophically: An Introduction to Critical Reflection and Rational Dialogue / Edition 1 by Richard E. Creel

Both groups measured the success of a lesson more by how well students had carried out classroom activities than by what students had learned from the activities.

Chapter 7 addresses assessments in detail, but here it is important to note that in choosing language that expresses objectives accurately, we are also choosing language that expresses important information about the assessment. To get your students working at the most complex level of thinking—either Synthesis and Evaluation Bloom, 1956 or Evaluating and Creating Anderson et al. How will you know that this student understands? Creel addresses objections they are likely to have and engages them right where they are coming from.
