Paper mill

Europeans also invented the Fence or Deckle, which keeps the paper within bonds Hunter 1943, 115.

Papermaking in Germany

The paper, of a rough manufacture, is similar to the kind that was used in Spain. Inspecting the surface can also determine age and location by looking for distinct marks from the production process.

The Evolution of Papermaking Part 1

After the Tang dynasty, rattan paper declined because it required specific growing areas, was slow in growth, and had a long regeneration cycle.

Back Cover

The Mayas were making a sort of bark paper as early as the ninth century. Stromer was a member of the city council, which he led from 1396.
