## Structured Literacy Instruction: The Basics

Struggling students are presented with one standard, validated intervention that addresses a variety of skills. Today's consumer is the most informed buyer that we have ever seen, with multiple resources right at their fingertips. Also, some learners may already have some knowledge about a topic, whereas some of them will be entirely new to the concept.

### Learner Centered Approach: Does It Really Matter In eLearning?

Structured Literacy instruction is marked by several elements: Phonology. Every organization wants to get the maximum benefit from its eLearning initiatives. This approach not only helps students with dyslexia, but there is substantial evidence that it is more effective for all readers.

### Effective Reading Instruction

The instruction of sound-symbol associations is often referred to as phonics. How is the cloud helping organizations find better ways to manage content? What are the potential problems? This includes grammar, sentence variation, and the mechanics of language.

### Orton Gillingham: What It Is

Homeschooling parents who really want to know how well their children are doing would do well to use The Diagnostic and Prescriptive Assessment rather than the usual standardized test. In a nutshell, a learner centered approach is one where the complete eLearning experience is focused on the learners. The school-based team selects individually tailored, evidence-based interventions because it is assumed that each student will respond to an intervention differently.

### Learner Centered Approach: Does It Really Matter In eLearning?

This intervention is often provided in a small-group setting for a set period anywhere between 10—20 weeks, with frequent progress monitoring. A school-based team makes decisions about the validated techniques used to provide more intensive instruction.

### Effective Reading Instruction

Plan to model the chosen learning behavior oftentimes more than once and to be an active presence in the room, moving from student to student, pair to pair, to monitor, ask and answer questions, and reengage students who lose focus.
