Corporate Finance And Investment: Decisions & Strategies by Richard Pike

Debt brings greater financial risk than equity since it carries an obligation to pay interest. Internal sources of funds include reserves of the company for long-term purposes and bank balances of the company and cash in hand with the company for short-term purposes.

How CFOs can keep strategic decisions on track

He is an experienced teacher, consultant and writer, and is the co-author, with Trefor McElroy, of the Pearson Education text Business Finance: A Value-Based Approach. So we will have different deal processes and different due-diligence checklists. EBIT-EPS analysis is a widely employed method to determine the most appropriate level of debt.

The datasets are also available as. At the same time, the cost of inventory should be minimised to the greatest extent possible in order to contribute to the low cost of production.

Pike, Neale, Linsley & Akbar, Corporate Finance and Investment: Decisions and Strategies, 9th Edition

With its focus on strategic issues of finance in a business setting, this text uses the latest financial and accounting data, articles and research papers to effectively demonstrate how, and to what extent, the theory can be applied to practical issues in corporate finance. When executives contemplate strategic decisions, they often succumb to the same cognitive biases we all have as human beings, such as overconfidence, the confirmation bias, or excessive risk avoidance.

How CFOs can keep strategic decisions on track

Difference between current assets and current liabilities is called net working capital. It is the responsibility of the finance department to secure funding for the current and future operations of the company. Financial strategy can provide clear guidelines about the risks involved in the projects.

Corporate Finance and Investment: Decisions & Strategies

Sources of Finance: Sources of finance are very closely related to the capital structure.
