## Historical Abstracts

Schaefer's textbook of physiology in 1900 was confident of this, but less confident of the exact representation of the visual field in this region. It thus tells us in some detail what one can legitimately claim to know and what one cannot. Except for an occasional mention in biographical accounts, it still remains neglected by the specialized scientific literature.

## Influence of Historic Violin Treatises on Modern Teaching and Performance by Hanna C. Hann

His understanding would anticipate his sight and form a conclusion suitable to his past experience. This showed the magnification factor to be much greater than previously thought.
