## DESIGN PROBLEMS IN ENHANCING PRODUCTIVITY AND INDEPENDENCE IN HOUSING FOR THE ELDERLY

CLIENT CANNOT PREPARE MEALS, DUE TO WHEELCHAIR INACCESSIBILITY OF KITCHEN. Those who are chronically depressed may struggle every day to get out of bed or perform the simplest tasks. Although the Act is rarely used, this would suggest that the sensibilities of others can be held to be valid grounds for over-riding the autonomy of an individual, whose actions or behaviour may be thought to lack dignity, given sufficient risk or nuisance to others.

### 11 Impact of Cultural, Social, and Community Environments on Home Care

Experiment 1: the effect of lighting on wayfinding Table 5 illustrates the mean, standard deviation and significant level of wayfinding from the effects of the CCT, illuminance level, and the type of view-out. For example, to minimize the sensory overstimulation that afflicts many people with dementia, design guides recommend modifications such as designation of quiet rooms with soft colors, elimination of unnecessary clutter, and removal of paging systems cf. Bringing technology into the nursing home: barriers and opportunities.
