Statistical and methodological myths and urban legends : doctrine, verity, and fable in the organizational and social sciences

It's as close to a 'must have' as there can be.

Statistical and methodological myths and urban legends : doctrine, verity, and fable in the organizational and social sciences

Comparing Classical Test Theory and Item Response Theory. Cortina, On the Practice of Allowing Correlated Residuals Among Indicators in Structural Equation Models.

More Statistical and Methodological Myths and Urban Legends on Apple Books

Topics covered include sample size requirements, missing data bias in correlation matrices, negative wording in survey research, and much more.

More Statistical and Methodological Myths and Urban Legends : Doctrine, Verity and Fable in Organizational and Social Sciences (Paperback)

Most doctoral students should have a copy of Lance and Vandenberg before they set words to paper in their dissertation proposals.

Statistical and methodological myths and urban legends: doctrine, verity, and fable in the organizational and social sciences by Vandenberg, Robert J, Lance, Charles E., 1954

Foster School of Business, University of Washington. The text includes many good charts and graphics that could come in handy as examples to be used in classes, especially high-level graduate classes in statistics or research methods.

Statistical and Methodological Myths and Urban Legends: Doctrine, Verity and Fable in Organizational and Social Sciences by Charles E. Lance

His methodological research stream includes measurement invariance, latent growth modeling, and multilevel structural equation modeling. This book meets an important need for the accumulation and integration of these methodological and statistical practices.
