Nurturing Scientific Talent

Despite the success of the health research enterprise, the system has become stressed increasingly in recent years for many reasons. Due to our focus on minimizing risk, our undergraduate students will begin the first few weeks of the fall semester online and move onto the campus after the Jewish holidays. .

Task Forces

Nonetheless, the appropriations for NIH grew steadily over the past decade Figure 2-7~. This ratio has changed slightly over the past decade, while the nation's investment in health research has tripled in current dollars Figure 2-2~.

Task Forces

At the same time, community foundations were beginning to form in cities around the United States. . Women: Their Underrepresentation and Career Differentials in Science and Engineering Proceedings of a Workshop.

Nurturing Scientific Talent

Similarly, annual grant awards from ADAMHA grew to nearly 600 in the same period. ~4 These funds support a variety of studies on the Medicare and Medicaid populations and the health industry providing services to these populations.

Restoring the Physical Infrastructure for Health Sciences Research

However, data from the Survey of Graduate Science and Engineering Students and Postdoctorates conducted by the NSF indicates a growing trend toward supporting trainees as research assistants on NIH research grants.

Nurturing Scientific Talent

. Although the number of funded research grants will grow by about 360-370 per year over the decade, the success rate for applicants will remain relatively unchanged presently about 24 percent if the annual number of applications continues to exceed the present 19,500 level. NSF's mission specifically excludes disease-related clinical research, which falls under the purview of NIH; therefore, NSF funds primarily are used for investigating basic biological processes that help shape the foundation for biomedical research.

Restoring the Physical Infrastructure for Health Sciences Research

. . Although the institute is sufficiently large to make a major contribution, it does not seek to replace the central role of NIH in any field.
