Manufacturing and economic growth in developing countries, 1950

However, the prospects for rapid productivity growth in agriculture are limited, therefore, labour shifts to the non-agriculture sector manufacturing and services, where there is greater scope for higher productivity and economic growth.

Manufacturing and economic growth in developing countries, 1950

The classification is based on the ISIC 3. The results suggest that structural change affects FLFP consistent with a U pattern, but the effects are small.

History Of Economic Development Employment Industrialisation

Penn world table revisions and their impact on growth estimates.

History Of Economic Development Employment Industrialisation

The share of industry, both in GDP and employment, has increased almost equally but at a slower pace.
