Several types of market failure are relevant to environmental problems.

The Realist Case for Climate Change Cooperation

Environmental Movement History is marked by movements that challenge the dominant political ideology in ways that cannot go unnoticed. Under the ESA, the federal government may not take any action that would result in the destruction or adverse modification of any federally listed species or its habitat. The trend seems likely to continue over the next several decades because China is in an energy-dependent phase of development and has few alternatives to coal.
