Fossil aphid

Discovered on the site in 1887, the fossilized tree stumps are thought to be more than 300 million years old. The expedition team was mainly interested in small dinosaurs that are closely related to birds, however, they discovered a number of interesting fossils of all shapes and sizes.

History of the fossil grove

Be sure to take advantage of these great rates on shipping.

Fossils for Sale

This tree was once a long-lived part of a true forest primeval. The stumps of the fossil trees were surrounded by layers of sandstone and shale which had to be carefully removed.

The World's Largest Fossil Wilderness

The journey took 30 minutes and ended in Area 5. The park is situated in the west end of town and we parked on the street, near the splendid gates.
