#### Cultural and genetic adaptations to malaria: Problems of comparison

At the end of World War II, WHO created a group known as the Committee of Experts on Malaria, which in 1947 set forth the principal guidelines for controlling the disease. RESUMEN Organización tecnológica del control de la malaria en São Paulo, Brasil, de 1930 a 1990 El aumento de la incidencia de malaria en varios países del mundo a partir de los años setenta, cuando parecía que estaba a punto de erradicarse la enfermedad, creó una serie de interrogantes y durante algún tiempo los malariólogos y las autoridades de salud pública escasamente comprendían lo que estaba ocurriendo. This article was published in Spanish in this journal Vol.

#### American Journal of Public Health

They feared that the ongoing crisis in UNRRA and the unstable political balance in Italy might ultimately impede their efforts.

#### **CAB Direct**

Medical Anthropology 5 4:311—339. In the course of all this the eradication concept was gradually abandoned and replaced by the risk approach, which initially was applied to various population strata, subsequently to paradigmatic epidemiologic situations, and finally to households and individuals. Smithsonian Institute Press, Washington DC.

#### Cultural and genetic adaptations to malaria: Problems of comparison

The overall malariogenic potential of Italy appears to be low, and reintroduction of malaria is unlikely in most of the country. Harper and Row, New York.

## New Osteological Data on Malaria in Sardinia from Antiquity to the Modern Era

A total of fifteen films illustrating each phase and the information which can be so obtained about the chest lesion are provided in slide form

#### American Journal of Public Health

First is the number of patients who live in rural areas, since these are the only areas where the vector can come into contact with a gametocyte carrier.

### Program to Eradicate Malaria in Sardinia, 1946

In light of this research, the article discusses current options for the control of malaria. In addition, the weakness of local power represented an additional advantage for a project that verged on being a military occupation of the territory. More specifically, as of 1990 roughly 85% of all cases came from only 79 municipalities.
