City and Guilds 3667

Our learning professionals are specially trained on how to interact with remote attendees and our remote labs ensure all participants can take part in hands-on exercises wherever they are. This is also having a major impact on cabling infrastructure design and layout.

Communicate magazine: DataComms Conference

The applications that harness communications cabling in a modern cabling system are also examined, providing a valuable insight into communications cabling and other media. Best data dashboard This category rewards the most effective management information tools that can help an organisation visually track, analyse or displays key data points to monitor the health of a business, department or specific process. Data determines brand identity, social media and PR strategy, and enables organisations to manage corporate reputation.

What If... We Built Our Own Scout Hall? by Phillipson, Mike Book The Fast Free 9781526203465

Best cartographic visualisation of data The category rewards organisations that have effectively used maps and cartographic charts to effectively communicate data. Best collation of data This category rewards those organisations that have employed effective and game-changing ways of

collating data. Although bend insensitive fibre is often not necessary for static backbone cabling, in the patch area the benefits are clear.
