Harmonic map from a Riemann surface into a Riemannian manifold is the extremal of the energy functional given by the Dirichlet integral. During the talks I will try not only to survey the known results and methods but focus especially on many open problems that

remain.

Generalizations to N by N systems. Upon completion of my studies, I started to pursue a Ph. We will also discuss the relation with the so-called Weil-Petersson class Teichmuller space.

Erste Ergebnisse zeigen, dass sich hierdurch sehr gut das Steifigkeitsverhalten solcher variabelaxialer Faserverbundbauteile berechnen lässt. Neben dem Vorgehen zum Erstellen entsprechender Simulationsmodelle wird anhand verschiedener experimentell ermittelter Bauteilkennwerte die Leistungsfähigkeit des verwendeten Modellansatzes immer wieder demonstriert.
